

Pelican Bistro

Design – Johan Lindstén

JOHANSON

Introduction

The new outdoor version, Pelican Bistro, builds on Pelican's lines and characteristic silhouette, but has been adapted to meet the demands of both public and private outdoor settings. With its airy metal construction, the chair has a light and graphic expression in which form and function interact. The open design gives the chair a natural sense of robustness while still feeling refined and inviting. The choice of materials makes it resistant to the elements, easy to maintain and easy to place in everything from outdoor cafés and terraces to courtyard settings and private patios.

The outdoor version has been developed with the same care for comfort and usability as the original. The result is a chair that feels effortless in its simplicity – stackable, durable and formally consistent – created to endure over time, both aesthetically and functionally, outdoors as well as indoors. Pelican Bistro is made entirely of metal, allowing the model to be offered in a full range of RAL colours.

Designer

Johan Lindstén's products are characterised by well-thought out design and unexpected details in a creative process that optimises function. Johan wants his designs to interact with their surroundings in a way that influences the mood of the user. He draws his inspiration from the most unlikely of sources, such as the lilac bush outside his home or the Ocean of Storms on the moon.

Recycling

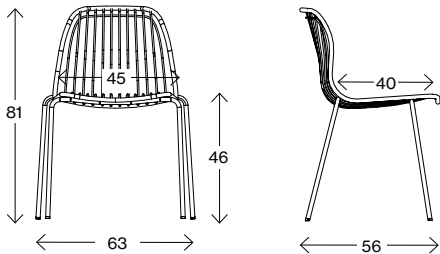

All steel parts are recyclable.

Before we finish the chrome/lacquer all grease/oil is removed by alkaline wash and then sent for destruction. The lacquering is produced by electrostatic epoxy powder coating that gives a minimum of waste. The electrostatic chrome (chrome 3) is recyclable. The plastic parts that are used are recyclable by grinding. All upholstery and frames of synthetic material are totally without C.F.C. emissions. All glue is water based.
